Past, Present, Future of Black Deaf Education
Center for Black Deaf Studies Symposium
March 30, 2023

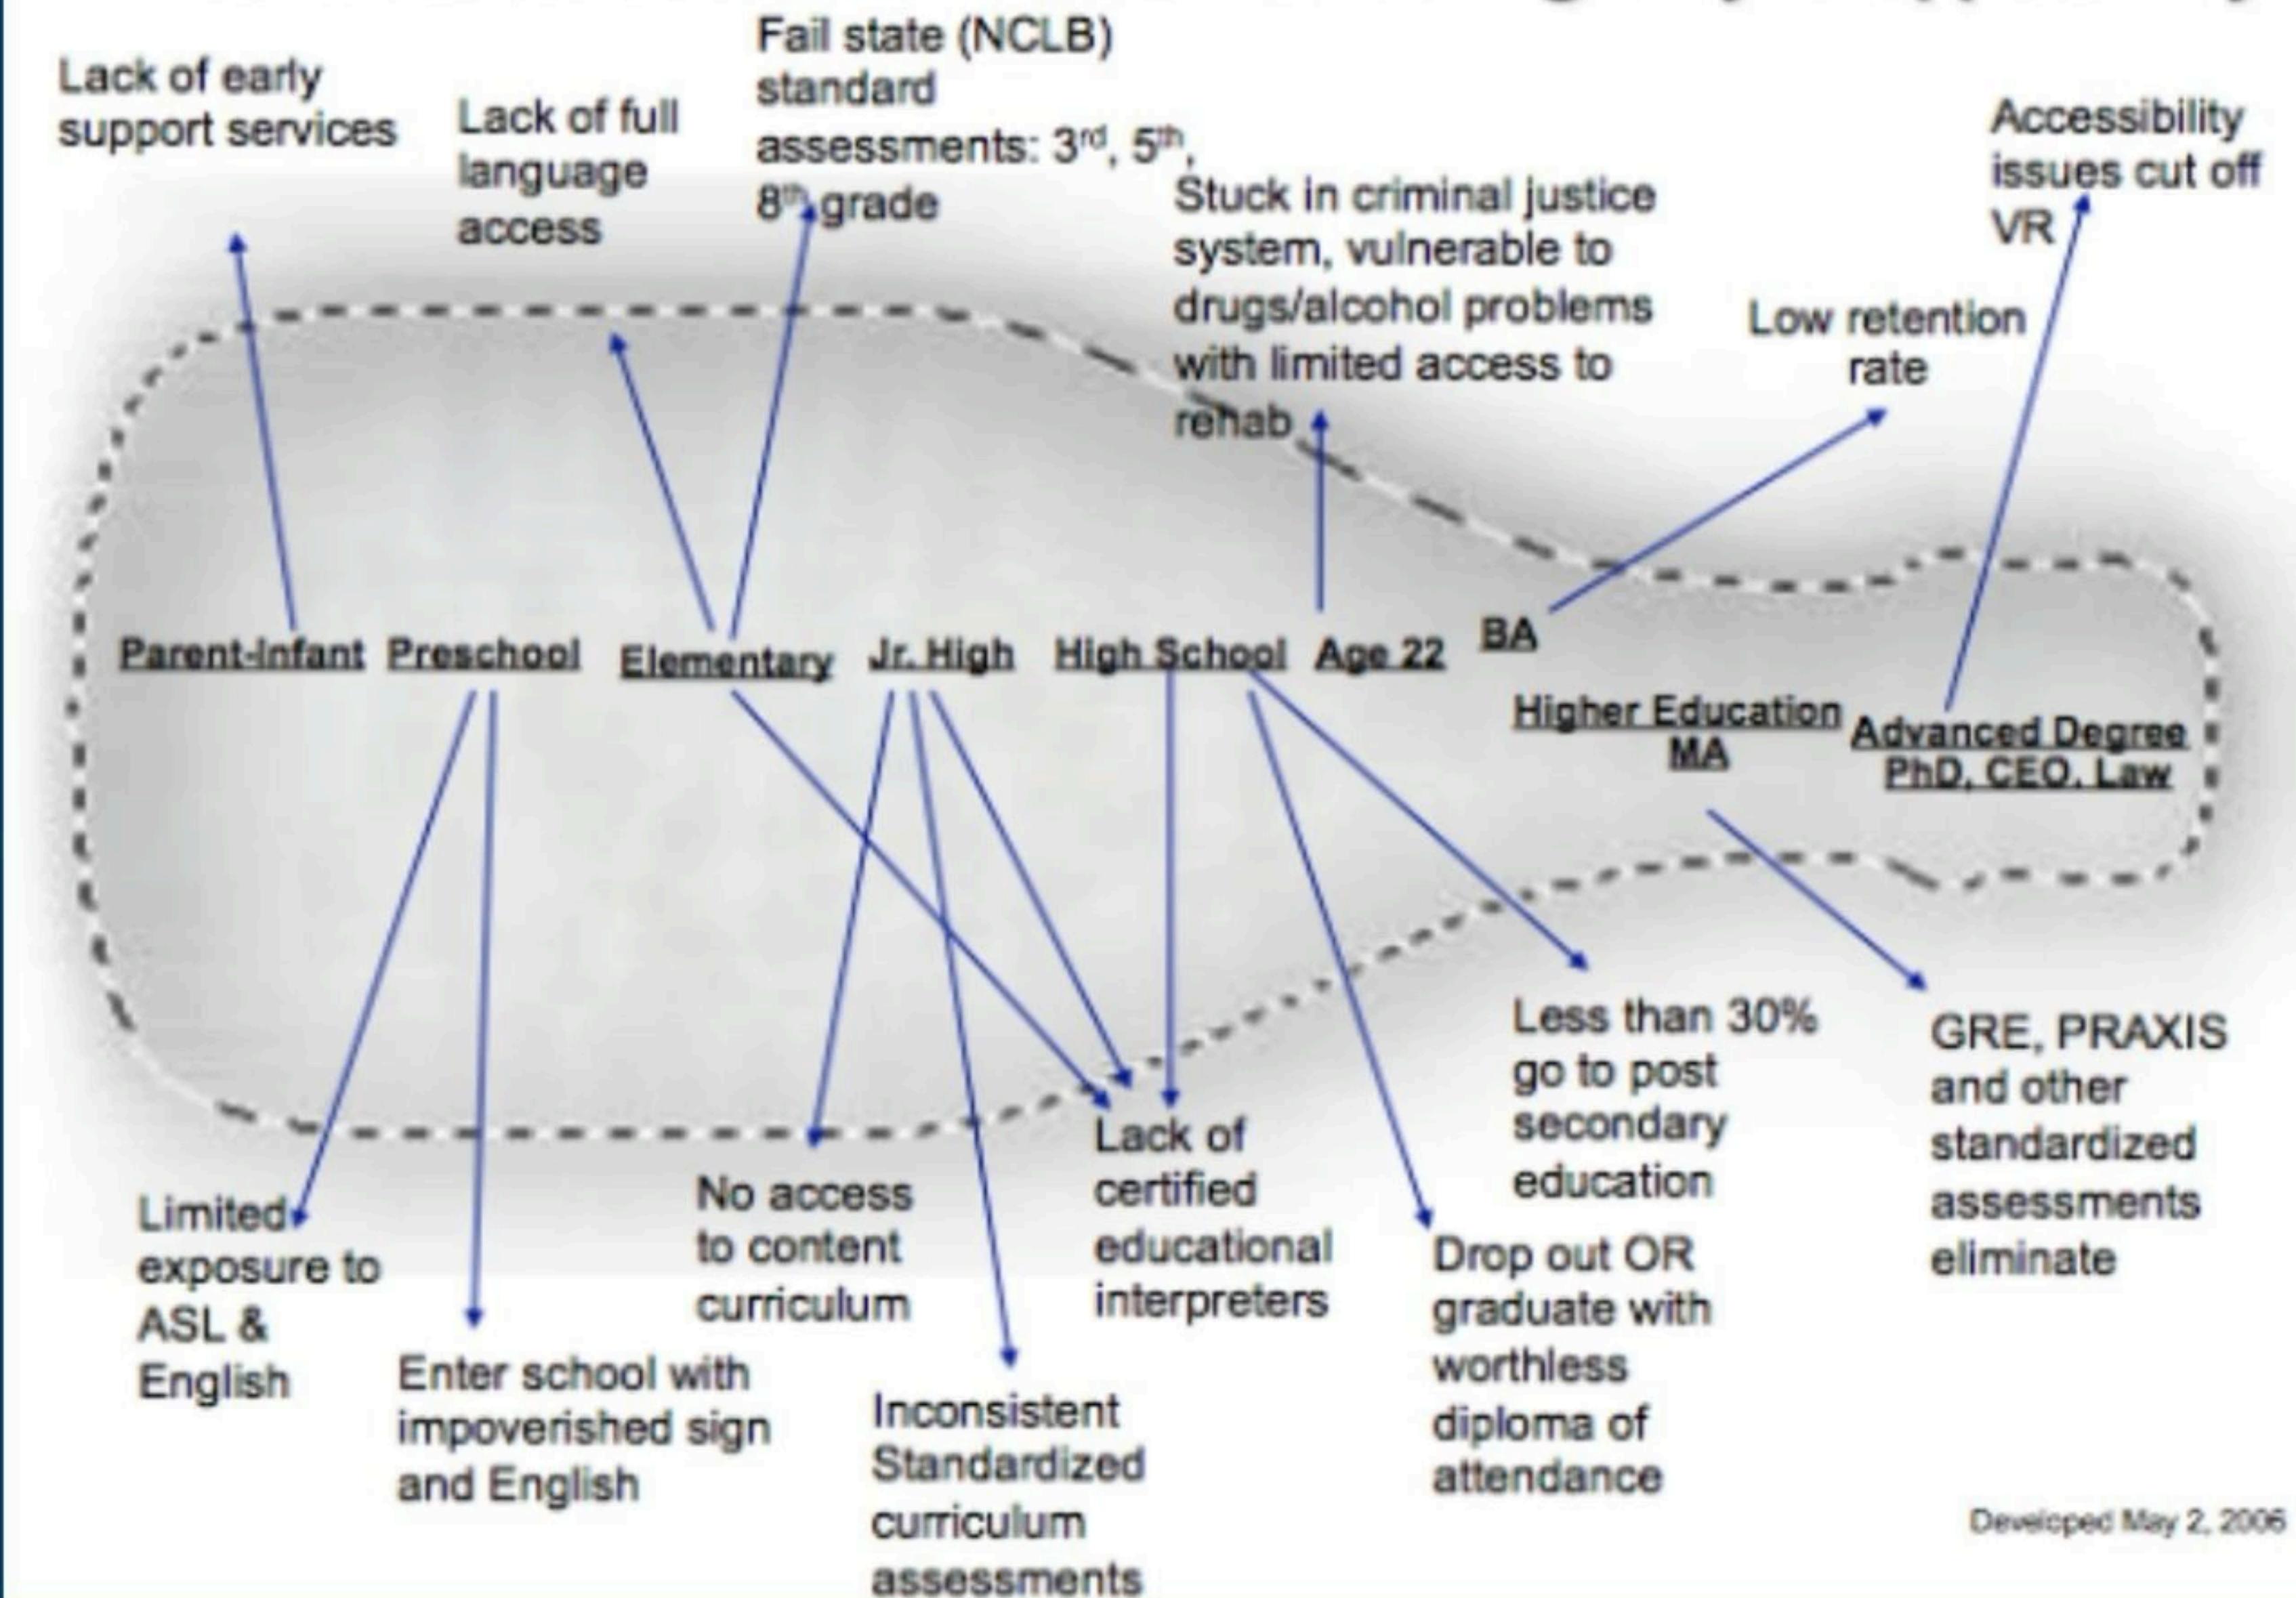

**CANDACE JONES,
DOCTORAL STUDENT**

Past is experience.
Present is experiment.
Future is expectation.
Use your experience in your experiments to achieve your expectations.

THE PRESENT

WHERE ARE THE **DEAF** EDUCATORS?

As of 2008, 22% of teachers in the field are Deaf. Only 2.5% out of the 22% are Deaf teachers of color.

Study proves black teachers have a significant impact on black students

Black students with at least one black teacher are more inclined to continue education

OAKLAND, CA - MARCH 12: Oakland High School 10th grader, Roashon Wilson writes answers on the board during a math excercise with instructor Tiago Robinson during the Manhood Development Program at Oakland High School on March 12, 2013 in Oakland, California. Robinson works with African-American students, monitoring the their grades and helping them communicate with teachers in classes where they are struggling. THE TRUTH

Most of us **NEVER** learned American Sign Language during our school days.

Most of us **ALWAYS** learned English during our school days.

ANOTHER TRUTH

More hearing students learn and study ASL than Deaf students.

Most of the ASL Curricula are designed for hearing students, not for Deaf students.

ASL is the third most-studied language in USA, outnumbered only by Spanish and French.
